Shinkamigoto Town, Nagasaki — October 28, 2026

Activity Report for Members (event-driven issue)

Linking the Island's Sky and Healthcare to the Future

First Meeting with Mayor Nobuaki Ishida — Airport Utilization, Island Healthcare, and Island MaaS

On October 28, 2026, Sadahisa Toyosaki, Representative Director of the Matrix of Cyber Smart City Consortium (MCSCC), and Seiki Soramoto, Executive Adviser, visited Shinkamigoto Town in Nagasaki Prefecture and met Mayor Nobuaki Ishida for the first time. They discussed Kamigoto Airport's utilization, island healthcare, tourism and mobility, and the local deployment of physical AI, and asked the town to consider joining MCSCC as a municipal member.

Key Points of the Meeting

- **Airport utilization** — Kamigoto Airport is a lifeline of the island, carrying doctor transfers and nighttime emergency medical flights. Its management is entrusted to the town by the prefecture, yet the prefectural budget is small: annual maintenance costs about ¥20 million, against a subsidy of only about ¥3 million. At the request of Osaka air traffic control, staffing was increased from two to three, and the town bears almost all of the personnel costs for the three staff. Together with the town's wish to restore scheduled flights, we discussed using the airport as a drone demonstration field (inspected also as a candidate site for Bulgarian large-drone demonstrations).
- **Island healthcare and drones** — We reported the Level 4 demonstration of pharmaceutical delivery by drone to Kamigoto Hospital, carried out in 2025 under the Kizuna Special Zone, and MCSCC's own Level 3.5 road-inspection drone demonstration in Nomozaki, Nagasaki City (a Cabinet Office survey project).
- **Tourism and mobility** — Inbound tourism, which had grown with the World Heritage inscription, fell with COVID-19, and recovery remains slow. Travelers have shifted from groups to small parties: rental cars are thriving, while the local tour bus company and large hotels face difficult conditions and small inns are doing well. The town is reaching out to travel agencies. A go-kart community MaaS demonstration is also under way. We proposed experiential tourism from Indonesia.
- **Request to consider municipal membership** — Nagasaki, Isahaya, Omura, Unzen, Shimabara, Hirado and Iki have already joined within the prefecture, and a comprehensive partnership agreement with Nagasaki Prefecture is under discussion.

Toward the Next Movement

Other topics — Under the Remote Islands Development Act, we also discussed transport access tied to tourism and daily life, local medical care, and measures against depopulation.

Building on these deliberations, we will turn the island's challenges into its future industries through concrete projects.

Dates
October 27–29, 2026

Visit
Shinkamigoto Town (Minamimatsuura District, Nagasaki)

Meeting
Mayor Nobuaki Ishida (28th, from 2:30 p.m., about one hour)

Accompanied by
Seiki Soramoto, Executive Adviser

Themes
Local deployment of humanoid / physical AI, Smart Island MaaS, airport utilization, island healthcare

After the meeting — Shinkamigoto Town Hall (October 28, 2026)
